

Business at OECD

2022 POLICY GROUP PROFILES

Established in 1962, *Business at OECD* (BIAC) stands for policies that enable businesses of all sizes to contribute to growth, economic development and societal prosperity. Through *Business at OECD*, national businesses and employers' federations representing over 7 million companies and international sectoral federations provide and receive expertise via our participation with the OECD and governments promoting competitive economies and better business.

Business at OECD (BIAC) membership provides tangible benefits:

- **Access to OECD** meetings, including opportunities at Ministerial level, as well as substantive OECD Committees, Working Parties and Expert Groups;
- **Data, Information & Analysis** – privileged access to cutting-edge OECD facts, evidence and policy guidance that shape national and international debates;
- **Global Network** of over 45 major business federations and their corporate affiliates in OECD countries and beyond to build private sector consensus;
- **Advocacy on-the-ground** at the OECD and internationally across nearly 30 cross-sectoral and targeted policy groups;

Our Committees and Expert Groups are at the core of our policy work. They help members to identify and understand OECD projects that are most relevant, provide guidance to navigate the Organization, and build private sector momentum to impact early stage policy making.

This document maps the activity of a selection of *Business at OECD* Policy Groups in their current shape.

The *Business at OECD* (BIAC) Anti-Corruption Committee supports OECD efforts to fight bribery and corruption, foster integrity and ensure a global level playing field for business globally. It therefore advises the OECD on prevailing and emerging corruption risks, explores innovative approaches to address bribery and proactively encourages joint actions between OECD, business and governments. The Committee is also an active contributor to OECD's work on 'Trust in Business' as well as B20 activities on compliance and integrity.

WHY OECD MATTERS FOR ANTI-CORRUPTION

The OECD, through its various instruments and tools, most notably the OECD Anti-Bribery Convention and the recently revised 2021 Recommendation on further combating bribery, is a leading institution in the international fight against corruption. The Anti-Bribery Convention is one of the most important international instruments to combat international bribery. It is focused on the supply side of bribery and has helped governments pass laws formally criminalizing bribery, strengthen their existing regulations, and foster effective enforcement. Aside of the OECD's monitoring activities in the context of the Convention, the Organization also conducts research and analysis on a range of issues such as drivers behind corporate compliance programs, the demand side of bribery, and the prevalence of corruption in state-owned enterprises (SOEs).

The Anti-Corruption Committee primarily contributes to the work of the following OECD bodies:

On Responsible Business Conduct, the Committee works closely with the OECD to ensure a balanced and effective implementation in the spirit of its Guidelines for Multinational Enterprises, constituting the centerpiece of the OECD's work on corporate responsibility and the most comprehensive standard on responsible business conduct, covering all key areas of business ethics. The Committee thereby underlines the need for a well-functioning NCP system that is well known and that enjoys the confidence of all stakeholders. The Committee also actively contributes to work on due diligence with a view to ensuring that practical considerations, especially with regard to the challenges faced by small and medium sized enterprises, are duly taken into account.

They are further supported with practical guidance on the due diligence expectations established in the Guidelines. Taking into account OECD members’ relations with China as a cooperation partner, economic competitor and systemic rival, the group encourages a mutually beneficial relationship – recognizing that differentiated approaches may be necessary to effectively progress towards concrete results. Our expert group consults at least annually with the OECD Ambassador-led *Informal Reflection Group on China*, and it organizes and contributes to thematic ad-hoc sessions with delegations and the OECD. We also work closely with the OECD’s senior representative in Beijing to strengthen the OECD’s presence in China.

WHY OECD MATTERS FOR THE CHINA RELATIONSHIP

Representing like-minded market-based democracies, the OECD Council at Ministerial level adopted a resolution in 2007 to strengthen the cooperation with China as a ‘key partner’ through a program of enhanced engagement. Based on the common interest of its member countries, the OECD advances policy dialogue with China in selected areas, promotes convergence of China’s policies, regulations and guidelines towards OECD standards. The OECD further seeks China’s gradual progress towards selected OECD legal instruments. Strategic discussions are also being held among OECD member governments with a focus on enhancing China’s commitment in common priority areas.

The Expert Group supports the following OECD bodies in this context:

- OECD Informal Reflection Group on China
- Senior OECD Representative in China

Development Committee

OUR WORK ON DEVELOPMENT

The *Business at OECD* (BIAC) Development Committee contributes private sector experience to the various development work streams in the OECD and related fora: outlining opportunities for and obstacles to private sector engagement that can drive sustainable development objectives.

Given the cross-cutting nature of the topic, The Committee also coordinates with other *Business at OECD* Committees in order to streamline development issues into their work and outline the interlinkages between different policy areas.

2022 BUSINESS PRIORITIES

- Highlighting the role of private investment and private sector finance for the promotion of emerging market development and the achievement of the sustainable development goals
- Supporting reforms to establish an enabling business environment and improve the ease of doing business in developing countries, including efforts to reduce barriers to trade and investment, fight against corruption and illicit trade, and promote good governance and domestic tax reform in developing countries

WHY OECD MATTERS FOR DEVELOPMENT POLICY

Development has always been an integral part of the OECD's mission of 'promoting better policies for better lives' within and beyond OECD countries. Indeed, through the OECD Development Assistance Committee, which provides a forum for the world's major donor countries to discuss issues surrounding development aid, the OECD is well positioned to act as a leader in international development. The Organization is further an important purveyor of statistics and analysis. Private Pensions Expert Group

OUR WORK ON PRIVATE PENSIONS

The *Business at OECD* (BIAC) Private Pension Expert Group covers economic and regulatory issues related to private pension schemes, sustainability of the schemes, funding, governance, protection of benefits, and financial education. The Covid-19 pandemic reinforced the need for a long-term perspective that can help prepare for future uncertainty through sustainable and flexible retirement savings schemes. The Expert Group advocates that regulation of pension plans must balance the interest of all stakeholders, including sponsor organizations. *Business at OECD* works to ensure that the policy guidance developed by the OECD on occupational pension defined benefit (DB) plans as well as defined contribution plans (DC) are aligned with the interest of employers as well as beneficiaries.

WHY OECD MATTERS FOR PRIVATE PENSIONS

The Covid-19 pandemic was a wake-up call to revisit the roles that our retirement saving systems can play in difficult times and to increase resilience against future shocks. This profoundly affected long-term growth projections and the availability of long-term finance. Investment policy shifts by national pension funds can have a substantial implication on the capital market, thus requiring close monitoring given the longer time horizon. Coordinating regulations of private pensions is a particular challenge to policy makers in the insurance and pensions industry.

Anti-Illicit Trade Expert Group (AITEG)

OUR WORK AGAINST ILLICIT TRADE

The *Business at OECD* (BIAC) Anti-Illicit Trade Expert Group (AITEG) allows the *Business at OECD* national federations and its business members to provide evidence-based and structured input to OECD activities on illicit trade. It provides business leadership and market insights through written comments on related OECD policy drafts, active participation in meetings of the OECD Task Force on Countering Illicit Trade (TFCIT) and relevant OECD conferences, and co-hosts events and projects on key issues for members. The COVID-19 pandemic led to unanticipated demand surges and supply chain disruptions for certain goods; in turn, this resulted in unprecedented opportunities for criminals to increase their already significant illicit activities. We believe additional measures are essential to address illicit trade and illicit markets related to COVID-19, with an important role for the TFCIT to play.

2022 BUSINESS PRIORITIES

- Promote policies to address illicit trade and illicit markets in relation to the COVID-19 pandemic
- Promote the TFCIT to external stakeholders as a trusted source of reference on illicit trade
- Assist governments in implementing OECD Recommendations on Enhancing Transparency in Free Trade Zones (FTZs)
- Develop guidance for addressing “Small Parcels” trade in contraband and illicit commodities and the role of e-commerce and on-line markets in fueling illicit trade
- Work with critical sectors, governments, non-governmental organizations (NGOs) and other key players to counter illicit trade and harness blockchain, AI and other technologies
- Support continued research and analytical papers on counterfeit (e.g. pharmaceuticals, alcohol, tobacco, food, toys and apparel as initial sectoral focus) and other illicit products
- Integrate convergence crime elements into work of the TFCIT, including corruption, money laundering, etc.
- Support regional TFCIT dialogues in strategic markets (e.g., UAE, APEC, Panama)
- Leverage *Business at OECD* AITEG and the work of the TF-CIT through public-private partnerships to elevate the global fight against illicit trade, counterfeits, consumer fraud

WHY OECD MATTERS AGAINST ILLICIT TRADE

OECD work focuses on evidence-based research and advanced analytics to assist policy-makers to map and understand the market vulnerabilities created and exploited by illicit trade. Recent work has examined governments’ institutional capacities to counter illicit trade and promote transparency in free trade zones (FTZs), and it has also looked into exploring institutional gaps that enable illicit trade in small parcels, FTZs, e-commerce, and across vulnerable sectors.

The Anti-Illicit Trade Expert Group contributes to the work of the following OECD bodies:

- OECD Task Force on Countering Illicit Trade (TFCIT)
